# SOUTHERN MAINE COMMUNITY COLLEGE

LEARNING LAB

Silly String Advanced Deployment Device

SMCC's all-new Mobile Learning Lab brings the excitement of STEM directly to middle school students across the region! Awaken your students' problem-solving skills, open doors to future career possibilities, and share the magical world of STEM - without ever leaving your school!

The Silly String Advanced Deployment Device Learning Lab will engage your students with a creative approach to engineering, networking, programming using a small, personal computer to remotely activate a Silly String Launcher!

LAB:

1 full-day session or 2 half-day sessions

SMCC will supply the hands-on materials, the school just needs to provide:

- Classroom
- Space to launch the silly string
- Teacher or facilitator to assist
- Internet access for instructor
